

RETOOLING OUR LANGUAGE FOR PEACE

A PRACTICAL & FUN WORKSHOP PLAYING WITH WORDS

Our everyday language is peppered with violent images, phrases, and words. The transition away from them to more peaceful images is not particularly easy because their connections are usually strongly wired.

This workshop begins the process of consciously choosing to alter one's speech and writing to describe the struggle for a meaningful life without using references to war and violence.

It consists of three segments:

Deconstructing Violence, Rewiring for Peace, Practicing New Language
The workshop is appropriate for ages Middle School-Adult
